**ANNOUNCEMENT ON RUNWAY RESTORATION WORKS FOR  
KONYA AIRBASE**

Re: NATO Document dated 23.03.2020 and numbered AC/4-DS(2020)0004 (INV)

1. This document was prepared by Ministry of National Defence of Türkiye, in accordance with article 4.1.1.2 of document mentioned in the reference above for assuring selection of well qualified firms bidding for "Restoration Konya Airbase Runway" awarded based on National Competitive Bidding" (NCB+).

2. **PROJECT SUMMARY AND SCOPE OF THE PROJECT:**

**Within the scope of Restoration Construction Works of the Runway;**

- Complete removal of the existing concrete main runway (East) 3350 m in length and 45 m in width including the layers such as the existing base, sub-base and filling etc. and reconstruction of the same with concrete asphalt.
- Construction of an additional taxiway providing direct access from the FOB (Forward Operating Base) Apron to the existing parallel taxiway, (taxiway is in 22.5 m width and the shoulders are 7,50 m wide and they are in 116 m + 168 m length, respectively)
- Removal and reconstruction of the runway shoulders (3 m wide)
- Removal and reconstruction of the runway overruns (325 meters long and as wide as runway on both sides of the runway)
- Removal and reconstruction of the runway infrastructure lines,
- Runway marking,
- Removal of the existing hook and net barriers, construction of the runway heads in accordance with the barriers to be assembled by the Turkish Air Forces, and construction of the necessary barrier infrastructures,

---

**Within the scope of Electrical Works for the Restoration of the Runway;**

- Removal of the existing lighting systems in the construction area,
- Construction of the indicators and other light warning systems for the edges, approach, threshold, runway end, overrun, precision approach path indicators (PAPI), taxiway and distance etc. and all kinds of infrastructure required for the new runway and additional taxiway to be constructed in accordance with the current NATO and aviation standards (Bi-SC 85-5, ICAO, Annex14, STANAG-3316, FAA, etc.) and connecting them to the regulator building,
- Revision of airport runway lighting control systems,
- Installation of the edge lighting and grounding systems for the taxiways or access roads and connection to the existing line that will be affected in the construction area are included.

3. The fund authorized for the project is 22.056.272 Euros. It is expected that the budget information based on the bid will not be disclosed to potential bidders. The works are planned to be completed in 700 (seven hundred) calendar days.

4. MOD intends to implement the NCB+ system open to NATO member countries in two stages based bidding. The lowest bid shall be awarded. It is planned that the bid documents will be published in the third quarter of 2022, and the deadline for bidding will be in the fourth quarter of 2022. The bids are to be declared to be valid until 01 January 2023 and the contract is planned to be signed and awarded by the end of the fourth quarter of 2022.

5. It must be known that the decision on the precondition for bidding companies to participate in this tender to complete or are currently performing or have the capacity to do any of the "VII.GROUP: Airport Works" as to be approved by the country of origin of the bidding firm.

6. It is requested to notify the list of the companies eligible to participate in bidding as qualified firms by 18<sup>th</sup> July 2022 at 11:00 a.m. The list to be notified should include the Company's Name, Telephone and Fax Number, e-mail address and contact personnel. This information is important in order to ensure correct and fast communication with companies that intend to participate in the tender and shall be sent to the address below.
